Boston, Oct. 12.—Only one winning game stands tonight between the Red Sox and the baseball champion-ship of the world. For the third consciutive time they defeated the Phillies, title holders of the National League, today by the same score that has marked all of the Red Sox victories—2 to 1.

Tomorrow the scene of battle shifts back to Philadelphia, where Alexander undoubtedly will be caled upon to pitch his third game of the series in an effort to stem the tide of Red Sox success. The two teams left for the Pennsylvania metropolis early tonight, the Phillies fairly deep in

Alexander Phillies' Last Hope.

A'exander is the last hope of the Phillies. He is ready and anxious to go back in the box tomorrow and is sure to give a good account of himself. He won from the Sox on last Friday and was defeated yesterday only by a fierce batting rally in the last of the ninth. The Phillies themselves feel that if they can give big "Alex" any sort of offensive support he will put across a victory tomorrow that at least will give the National Leaguers a fighting chance in the series.

series.

The Philadelphia batters took rather kindly to Ernest Shore's offerings today and made more hits than they had registered in any one of the three previous committees. The power to drive in the runs was lacking, however, and eight of the visitors were left stranded on the paths. But "Gavy" Cravath sent Lewis back to the left field fence again today to catch a drive that on the Philadelphia grounds would have been a hit into the stands and good for the into the plants and the fillies and the fillies and some of the pitcher of Alexander's ability and there are many students of the game tonight who do not share the con-fidence of the Red Sox that tomor-row's contest will be the last.

Why Do Auto Bearings Wear in Spite of Oil?

TRY to run your car without any lubricants and what happens? Every bearing will shriek like a lost soul ill friction ruins it. Put in grease or oil and what happens? The car runs without squealing, but, even so, somehow the Scarings wear. Why?

Because steel cannot be polished to absolute smoothness. The brightest, smoothest looking bearings are full of little microscopic holes and protruding points. It is these grinding over each other that create friction. Oil or grease by their very nature can only smear these over, make them slippery. They still wear and break off.

DIXON'S Graphite Grease

For Transmissions and Differentials

But there is one lubricant that absolutely obliterates these microscopic rough-nesses. Dixon's selected flake graphite will fill these holes and build up a smooth. oily veneer around the little protruding points until the whole bearing is smooth beyond description. No other graphite has this quality. Dixon's selected flake graphite is the only graphite produced that has the peculiar thinness and flatness of flake, a toughness and elasticity that will make it build up and not adhere to itself, ball up or pack. Dixon's Graphite Automobile Lubricants are the only automobile lubricants made that contain this rare form of graphite flake.

Why? Because the Joseph Dixon Crucible Co. are the only graphite workers in the world who have facilities for producing this peculiar form of graphite flake free from imperfections. That's pretty strong, but it's a fact.

We suggest that you get acquainted with this line by first trying out Dixon's Graphite Transmission and Differential Greate No. 677. Talk it over with a Dixon dealer; he knows just what you need for every part of your car.

Ask your dealer for Lubricating Chart.
